

Personal Income and Per Capita Personal Income by State and Region

This article was written by Duke Tran. The estimates of State personal income were prepared by the Regional Economic Measurement Division.

THIS ARTICLE briefly discusses the preliminary estimates of State personal income for the fourth quarter of 1996 and for the year 1996. It then focuses on the preliminary estimates of State per capita personal income for 1996.

Personal Income

In the fourth quarter of 1996, personal income in the Nation increased 1.3 percent after increasing 1.4 percent in the third quarter.¹ In

1. This estimate of personal income for the Nation is derived as the sum of the State estimates; it differs from the estimate of personal income in the national income and product accounts (NIPA's) because, by definition, State personal income omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by pri-

the fourth quarter, the five States with the fastest growth in personal income were Nevada, Nebraska, Kansas, North Carolina, and Montana. In each of these States, increases in earnings in services and in finance, insurance, and real estate exceeded the increase in personal income, and most of these States also had above-average increases in earnings in farming, in manufacturing, and in retail trade.

In the year 1996, personal income in the Nation increased 5.4 percent. By component, increases ranged from 5.8 percent in net earnings to

vate U.S. firms. This estimate can also differ from the NIPA estimate because of different data sources and revision schedules.

In this section of the article, the percent changes are at quarterly—not at annual—rates.

CHART 1

Per Capita Personal Income: Percent Change, 1995-96

3.9 percent in dividends, interest, and rent.² In most States, the increase in net earnings exceeded the increase in dividends, interest, and rent.

Per Capita Personal Income

Per capita personal income in the Nation increased 4.5 percent to \$24,231 in 1996, up from \$23,196 in 1995. The increase in per capita income was more than double the 2.2-percent increase in the prices paid by U.S. consumers (as measured by the chain-type price index for personal consumption expenditures). By State, the increase in per capita income exceeded the increase in U.S. prices in all States except Alaska and Hawaii.

Fastest growing States

In the 10 fastest growing States, the increases in per capita personal income in 1996 ranged from 11.2 percent in North Dakota to 5.1 percent in Delaware and Illinois (table A and chart 1). In all 10 States, personal income increased more than the 5.4-percent increase for the Nation, and in all the States except Utah, Oregon, and Delaware, population increased less than or was equal to the 0.9-percent increase for the Nation.

In six Plains States—North Dakota, South Dakota, Iowa, Nebraska, Minnesota, and Kansas—the growth in personal income was boosted by substantial increases in farm earnings that mainly reflected a high level of corn

production in 1996 after a low level in 1995 (table B). In North Dakota, wheat production was also strong. In most of these States, increases in earnings in construction and in services exceeded the increase in personal income. In addition, earnings increases were above average in durable goods manufacturing in South Dakota,

1. Net earnings by place of residence is calculated as earnings by place of work less personal contributions for social insurance plus the adjustment for residence. Earnings by place of work is calculated as the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income.

2. See table A, footnote 1.

Note on the Estimates of State Personal Income

Each April, as part of the procedure for developing the national control totals that are used for the State estimates, the following BEA annual estimates of wage and salary disbursements for the most recent year are compared: The annual national income and product account (NIPA) estimate, which is based primarily on monthly national data from the Bureau of Labor Statistics (BLS) establishment survey, and an alternative annual estimate, which is based primarily on BLS tabulations of wages and salaries of employees covered by unemployment insurance for the first three quarters and on a BEA estimate for the fourth quarter. This year, because the two series did not differ significantly, the NIPA estimates of wage

and salary disbursements were used to develop the annual national control total for 1996.

As usual, the NIPA estimates of wage and salary disbursements for 1996 will be revised in July to incorporate the unemployment insurance tabulations for all four quarters of 1996. The annual State estimates will be revised in September.¹

1. Although last year's annual revision of the NIPA's was limited in scope, the unemployment insurance tabulations of the four quarters of 1995 were incorporated in the NIPA wage and salary disbursement estimates released in August 1996; they were incorporated in the State wage and salary disbursements in September 1996.

in wholesale trade and in finance, insurance, and real estate in Minnesota, and in durable goods manufacturing in Kansas.

In Utah, Oregon, Delaware, and Illinois, increases in earnings were above average in services; in Utah, Oregon, and Delaware, earnings increases were also above average in construction and in finance, insurance, and real estate. In addition, earnings increases were above average in durable goods manufacturing and in trade in Utah, in durable goods manufacturing in Oregon, in farming and in trade in Delaware, and in farming in Illinois. In Delaware and Illinois, transfer payments increased at above-average rates.

Slowest growing States

In the 11 slowest growing States, the increases in per capita personal income in 1996 ranged from 3.6 percent in New Hampshire, Michigan, and Idaho to 1.7 percent in Hawaii. In all 11 States except Idaho, personal income increased less than the 5.4-percent increase for

the Nation. In six States—Michigan, Maine, Maryland, Wyoming, Alaska, and Hawaii—population increased less than the 0.9-percent increase for the Nation; in New Hampshire, Idaho, New Mexico, Montana, and Tennessee, population increased more than that for the Nation.

In most of the 11 States, earnings either declined, were unchanged, or increased at below-average rates in farming, in mining, in construction, in manufacturing, in transportation and public utilities, in wholesale trade, and in government. In addition, earnings increased at below-average rates in retail trade and in finance, insurance, and real estate in New Hampshire and Alaska and in retail trade in Maine, Maryland, and Hawaii.

In most of these States, dividends, interest, and rent increased at below-average rates. In New Hampshire, transfer payments also increased at a below-average rate.
